CUT WORKS ARCHITECTURE LIMITED

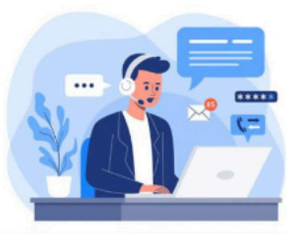

Mr. David Cuthbert, Principal Architect and Director of Cut Works Architecture Limited, describes himself as a creatively-curious, energetic and zealous entrepreneur. These qualities have led him to begin this architectural practice that has expanded into interior design and consulting. Cut Works celebrated its 5th anniversary in 2022 and continues to pursue its aim to become a single source for all things related to architecture.

David remarked on the edgy name of his company and said "The name was an attempt at letting the company have its own identity, whilst still having a connection to its founding Architect." Cut Works provides services in residential, commercial and development sectors with an emphasis on modern, sustainable design.

Through these services, David hopes to respond to the issue of the residential market in Jamaica which he believes is greatly underserved. He said, "Many who provide design services for the market do so without having the necessary qualification and license to." David wants that when customers engage with Cut Works that they commend them on having the perfect balance of being personable and professional.

As a participant in the JBDC Accelerator Programme, David said, "We know we are a small (micro) business in a uniquely placed market... but the confidence that is constantly bestowed on us at every corner is heartening, as well as being asked to be one of the faces of Cohort 4 is inspiring and humbling." Continuing to sing the praises of the programme he said, "It was great having someone external to be both accountable to, as well as champion your successes and goals.
